

## crystal vine

This intriguing scope features a silvered glass globe base that is adorned with hundreds of tiny iridized crystal flowers and leaves that also vine over the silver scope body. The cell is transparent and mosaiced with tiny pieces of clear dichroic glass that glimmer and change colors. Also in the liquid filled cell are crystals, beads, wire sculpture, and lampworking. The effect of this combination is beautiful and mysterious.

2 mirror 6 point star. 3 diopter glass magnifying lens. Size approx.: 9 1/2" high with a 3" round footprint. Kaleidoscope is 9" x3".
