

diamond

A sparkling "diamond" bracelet adorns this elegant handheld kaleidoscope. The liquid filled cell has crystals, "diamonds", dichroic glass and jewelry findings - and it truly sparkles like the real thing (see mandala photos). The aluminum tube, eyepiece and cage are powder coated in a rich textured black that finishes the elegant look of the piece. First surface mirror. Two-mirror, 6-point system brings you dozens of jewels that flash with color every time you turn the cell. Eye piece fitted with a 3-diopter glass lens. Size approx.: 8 1/4" x 2 3/4".
