

monet bridge

The delicate beauty of the Claude Monet's garden with its Japanese bridge is captured in this scope. The arching mirror system echoes the shape of the bridge as pastel flowers tumble over it. The liquid filled cell has crystals, beads, flowers, leaves, lampworking, and art glass in shades of lavender, pink, blue, yellow and green. Aluminum eyepiece and cage and tube are powder coated in an appealing lavender. First surface mirror. Eyepiece fitted with a 3 diopter glass magnifying lens. Size approximate: 8 1/4" x 2 3/4".
