

## starfish collector

What a wonderful way to capture the fun of a day at the ocean. A large graceful ginger jar holds a collection of starfish - all different sizes, shapes and colors. The kaleidoscope itself is powder coated a rich taupe and the wooden base matches it. The liquid filled cell has starfish, coral, shells, beads, mini glass sculptures, crystals and pearls floating in endlessly fascinating patterns. And the colors are turquoise , coral, sand and blue. All natural beauty.

2 mirror 5 point star system. 3 diopter magnifying lens. Size approx.: 16" high with a 5" square base and a kaleidoscope that measures 9" x 3".
