

## white wave

If dichroic glass can be subtle - this is it. One panel of this textured white wooden base is mosaiced with waves of transparent multi-colored dichroic glass - as is the white powdered coated scope body. The transparent side lit liquid filled cell has more pieces of dichroic, as well as crystals, wire working, beads, and lampworking in sparkling array. Truly showstopping.

2 mirror 6 point system. 3 diopter glass magnifying lens. Size approx.: 16" high with a 4 1/2 " base with a 8 1/2" x 2 3/4" scope.
