

## woodshop

A wonderfully curved black lacquered wood base is embellished with sculptural wood pieces in many tones of beige and brown for this dramatic kaleidoscope. Each of the 4 sides is different. Since each kaleidoscope is unique the patterns and pieces may differ from the photo but the same elements will be used. The liquid filled cell is just as unique as the exterior and is filled with beads, buttons and sculpted pieces in wood as well as wireworking, leaves and charms. The cell colors are brown, beige, orange, gold, copper, and green and the effect is warm and sophisticated.

2 mirror 6 point star. 3 diopter glass magnifying lens. Size approx.: 16" high with a 4 1/2" square base. Scope is 8 1/2" x 2 3/4".
